

Direct Push Analytical Corp.

Safety

Can an accident or breakdown affect the overall job cost?

Will your service provider bring poorly trained personnel and add unnecessary risk, which can equate to added cost to your jobsite?

Direct Push Analytical operators are “professional grade, very knowledgeable, friendly, accommodating, helpful, adaptable, willing, efficient, flexible and responsive” based upon our customer survey responses AND have between 7 and 20 years of related, industry experience.

Is your provider up to date on the following training requirements?

- OSHA 40 Hour
- OSHA 8 Hour Refresher
- Medical Surveillance Program
- American Petroleum Institute Training
- Drug Testing
- Incident Investigation and Reporting
- Fatigue Management
- Job Safety Analysis
- Corporate Safety Program

Direct Push Analytical operators maintain CURRENT training/certification in the above programs. CURRENT certificates available upon request.

Does your service provider’s Worker Compensation Experience Modification Rate (EMR) indicate unsafe practices?

Direct Push Analytical Corp.’s latest EMR was 0.05. The lower the number, the lower the claims and directly correlated to proper training and education. Typically an EMR of 1.0 or higher requires explanation.

Is your service provider appropriately and sufficiently insured should a catastrophe strike?
Per industry standard contracts typical policies include the following minimum requirements with limits of at least:

- Employee Liability \$ 1,000,000 per occurrence
- Commercial General and Contractual Liability \$ 1,000,000 per occurrence
- Automobile Liability \$ 1,000,000 per occurrence
- Pollution Liability \$ 1,000,000 per occurrence

Direct Push Analytical maintains policies covering the above limits as well as an Umbrella Liability policy of \$ 1,000,000 in the aggregate.
